

assignment-3

Kenneth Amadi

Question 2

a. Create two lists 'firstname' and second 'surname'. Using *for loop*, create a third list called 'fullname'.

b. Use *camecase* (capitalize each first letter of the names) for each of the name in the 'fullname' list

```
In [1]:  firstname = ["chisom", "phebe", "mary", "peter", "paul"]
         surname = ["williams", "austin", "jones", "henry", "brown"]
```

```
In [2]:  # first create an empty fullname list
         fullname = []
         for i in range(len(firstname)):
             fullname.append('{} {}'.format(firstname[i], surname[i]))
```

```
In [3]:  print(f'The fullnames are:- \n\n{fullname}')
```

The fullnames are:-

['chisom williams', 'phebe austin', 'mary jones', 'peter henry', 'paul brown']

```
In [4]:  # capitalize each first letter of the names in the fullname list
         for i in range(len(fullname)):
             fullname[i] = fullname[i].capitalize()

         print(f'The modified fullnames are:- \n\n{fullname}')
```

The modified fullnames are:-

['Chisom williams', 'Phebe austin', 'Mary jones', 'Peter henry', 'Paul brown']

In []:
